

Project: EventHub

In this project, I designed a complete user flow and interface including the following pages

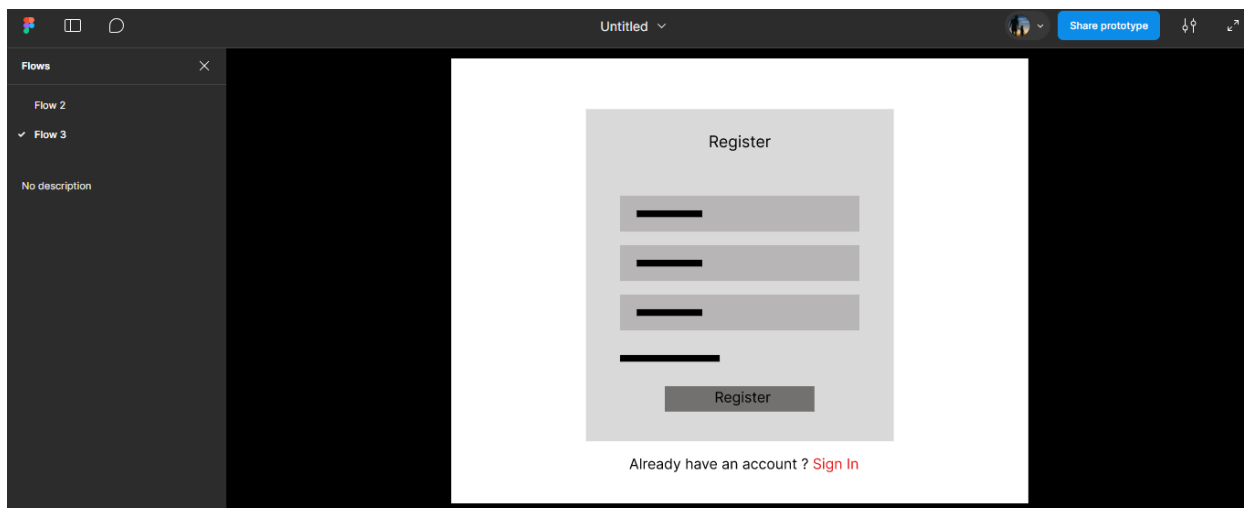

Main page:

I created a main dashboard that provides an overview of key features, quick navigation, and user insights.

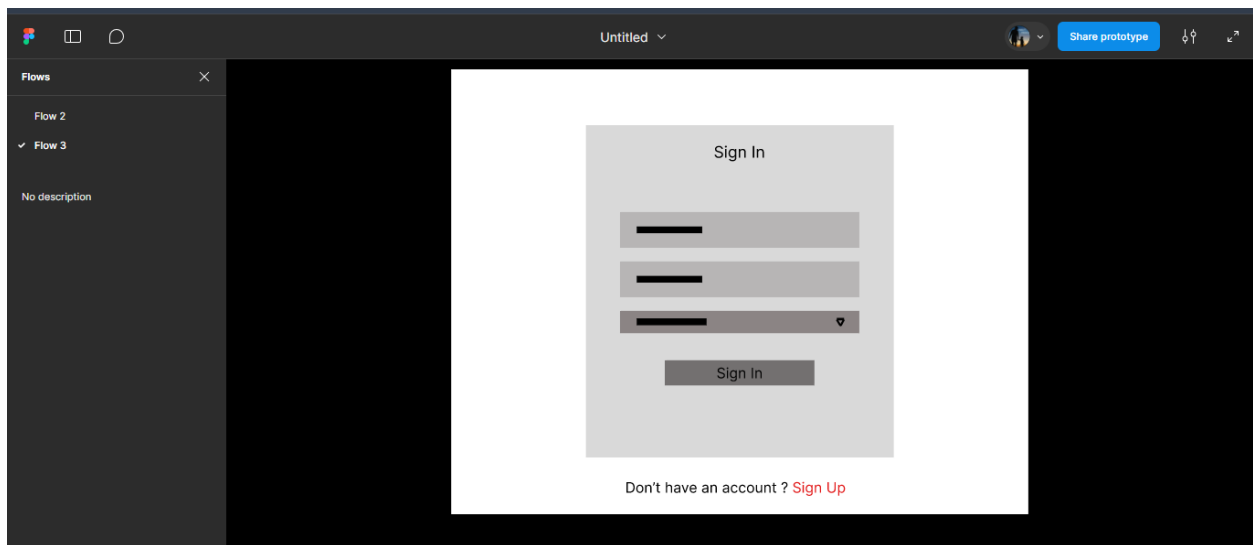

Signup page

I built an easy-to-use sign-up page that allows new users to register quickly with minimal steps.

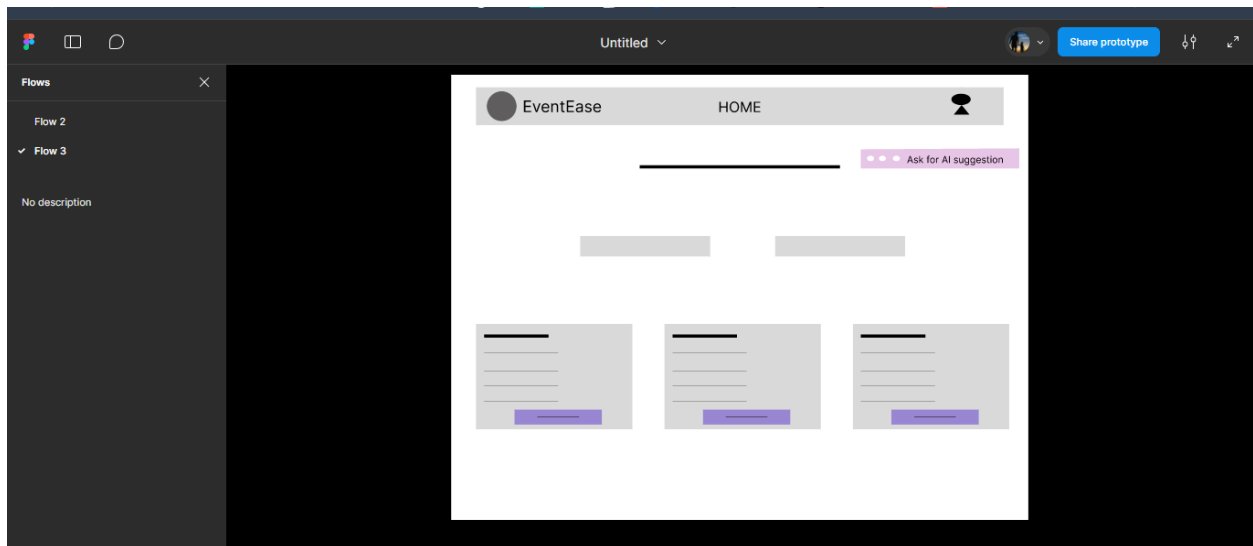

Sign in page:

I designed a clean and user-friendly sign-in page for users to securely log into the platform.

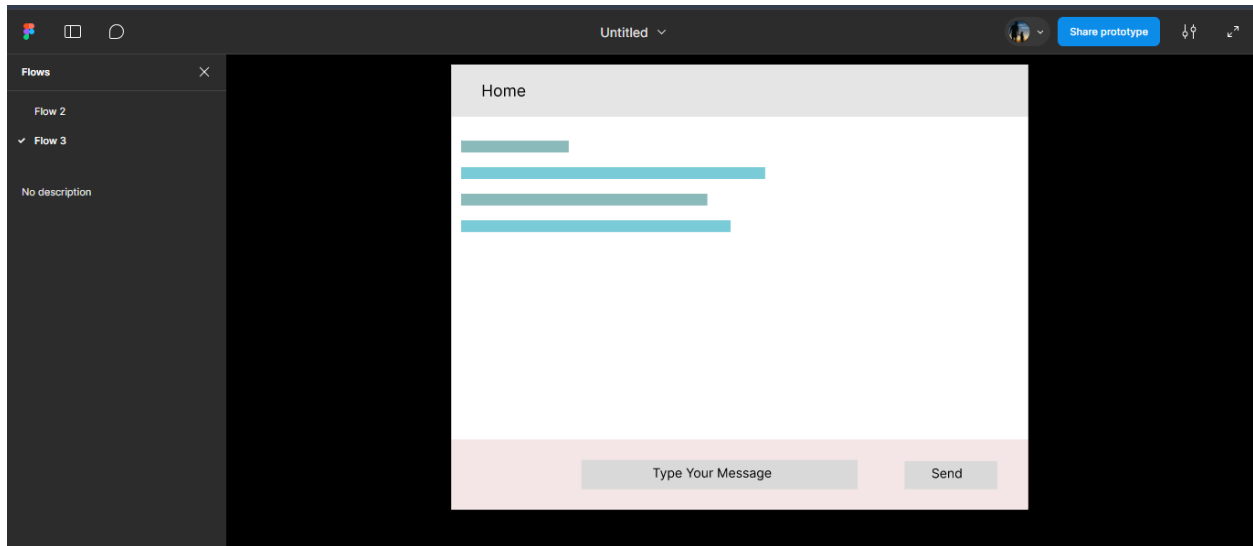

User Dashboard:

I developed a personalized user dashboard where users can manage their profile, settings, and interact with platform features.

Ai suggestion :

I created an AI interaction page where users can experience AI-driven functionalities and insights.

Admin Dashboard:

I designed a detailed admin dashboard for managing users, content, and overall platform analytics efficiently.
